

System MAC Address Registration

If you are planning to use a laptop computer on the network during the conference please could you register your computer's MAC address(es) by browsing to the link <http://www.nottingham.ac.uk/~cczpsh/ahm07> when you first connect, or alternatively fill in the table below and return it to reception. This is particularly important if you are using a wireless connection.

This is to assist us in quickly locating the owner of a system in the event of a problem occurring during the conference, such as a denial of service attack from an infected system.

Delegate or Exhibitor Name	
Institution	
Booth Number (if exhibitor)	
Mobile Phone Number	
System MAC/Ethernet Address (12 hex digits) Mandatory	

(Tips on finding the MAC address - under XP use **ipconfig/all** in a command window, under Windows98 run **winiipcfg**, under linux use **ifconfig**) Please ensure you are looking at the Ethernet adaptor and not the PPP adaptor on Windows systems.

Please return the completed form to the reception desk as soon as possible.

Thank you.
